

Mekano® - Multidiscipline, incl. Pipe Support

INTENDED USE

Mekano® CH50-2T in 2.5 mm thickness are triangular shaped, area efficient, light and extremely versatile channels. They are ideal for support of heavier loads for electro, instrumentation and HVAC applications and light piping.

INSTRUCTION FOR USE

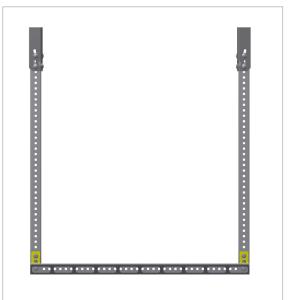

Mekano® CH50-2T channels is fixed together using M10 self locking bolts. The square holes ensures full mechanical locking.

Channels can be fitted back to back, but we recommend using an angle bracket in connections between two CH50-2T channels to fit at least two bolts in every connection.

Attach the parts loosely with self locking bolts, adjust and tighten securely.

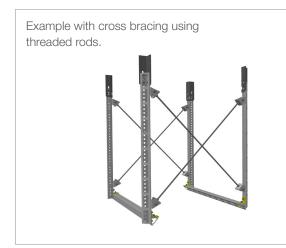

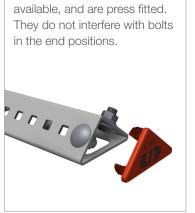

CH50-2T2.5 with CH100-1 back to back. The large holes on one side of the triangle channel make the channel easy to assemble. The bolts can be fitted from both sides.

Typical U-support, with additional angle brackets.
