

## INTENDED USE

Mekano® CH100-3 is a U-shaped channel for support of medium to high loads and for piping applications.

## INSTRUCTION FOR USE

Mekano® CH100-3 channels are fixed together using M10 self locking bolts and with splice connectors and angled brackets.

The large hole on the inside of the channel allows the bolts to be easily fitted.

The open end of the U-profile should be closed when jointing sections together to give maximum torsional strength.
