

INTENDED USE

Central Support Arms for LOE Cable Ladders are available in 100 - 600 mm lengths. Suitable for fixing with LOE ceiling brackets.

NOTE:

Support arm in PG and SS suits only CH42-1 channel. Support arm in HDG suits only CH50-1 channel.

INSTRUCTION FOR USE

Fix the support arm to the vertical support.
The Cable Ladder can be lifted at an angle so the arm passes through the space between two rungs.
The Ladder can then be laid on the Support Arm.

The LOE Cable ladder can then be secured by one of the alternatives:

1. Using self tapping screws from below.
2. Using the Pendular Bracket Clamp.

Adjust all and tighten securely.
