

## INTENDED USE

Central brackets for attaching LOE Cable Ladder Support Arms to vertical support. Slotted holes on the support bracket and the support arm allow for vertical and horizontal adjustment. they can also be fitted off-centre for uneven loads.

## INSTRUCTION FOR USE

Fix the central bracket support arm to the support arm and attach to the vertical support.

The Cable Ladder can be lifted at an angle so the arm passes through the space between two rungs. The Ladder can then be laid on the Support Arm and bolted from the sides.

Adjust all and tighten securely.
