

## INTENDED USE

Universal bracket for fitting INKO® or ETIN™ tubing clamps where the hole direction is different to the normal intended pattern, onto alternative bases, or using Hilti S-BT M10.

Can also be used as a fixing bracket for cable tray or equipment plate for post paint fastening on steel applications.

The bracket is equipped with holes for M10 and M6 bolts on both sides.

## INSTRUCTION FOR USE

Fix the bracket loosely to structure using self locking bolts. Adjust and tighten securely.

Tubing clamps, tray or plate can then be fixed to the bracket.

When fitting a cable tray to the bracket the bolts should be fitted from the inside of the tray to prevent damage to cables.
