

INTENDED USE

Strong and stable Light Fitting Bracket suitable for fitting to OE ladder. Allows the light to be fitted flat to ground or at a 60° angle.

INSTRUCTION FOR USE

Screw the brackets securely to the light fitting using the manufacturer's recommended fastenings.

The complete armature can then be hooked over the top of the ladder, and the brackets pulled open to allow the bracket to go over the side rail at the bottom.

Fix in place with self locking bolts. Adjust and tighten securely.

The bracket can also be fitted with a stretch preventor bracket.
