

## INTENDED USE

SPB Reducer Part are used to cleanly change the tray width, and can be used from both right and left hand sides. The reducers can also be combined with directional changes as shown.

Suitable for 40 mm SPBE, SPB-RF and SPB-LB.

## INSTRUCTION FOR USE

When reducing one side, the SPB Z-Reducer Part is used together with a Splice Connector (not included) to attach two trays of different width.

The parts are assembled loosely, adjusted and then tightened securely. When reducing both sides, an additional splice is not required.
