

## INTENDED USE

INKO® is a tubing clamp designed for quick assembly to fit all lateral slots. (Adapter brackets are available for longitudinal slots). Two types are available covering tubing diameter from 6-42 mm.

## INSTRUCTION FOR USE

### To suit 6-13 mm tubing:

Clip the clamp over tube.

Fit on the tray, and turn the bolt legs to fit the slots.

Secure and fix by turning the bolts. Typical torque is 5-6 Nm.

### To suit 14-42 mm tubing:

Open the clamp halves and place on tray.

Add the tube and turn the top half to cover the tube.

Turn the bolt legs to fit the slots. Secure and fix by turning the bolts. Typical torque is 5-6 Nm.
