

INTENDED USE

Adapters used to fasten a U-Strap to a Mekano® channel.

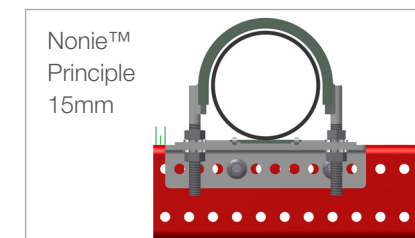

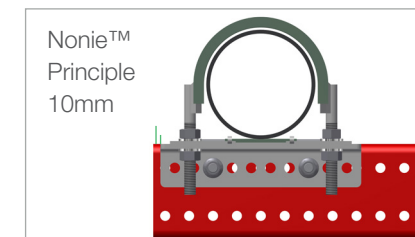

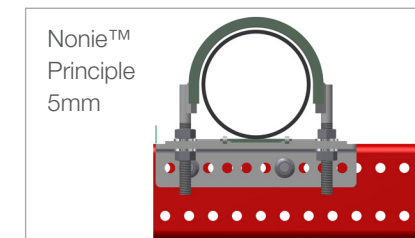

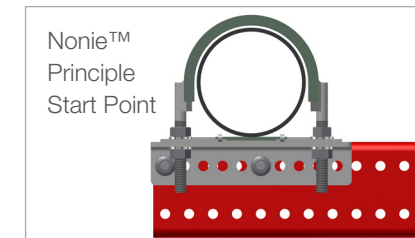

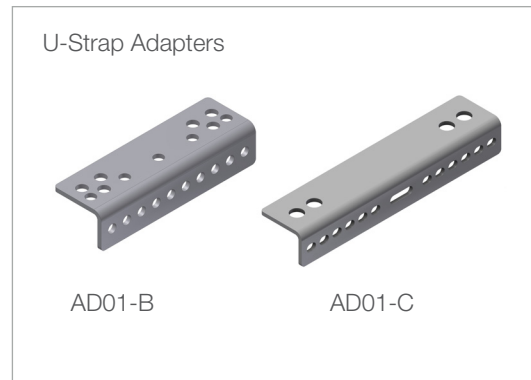

INSTRUCTION FOR USE

Use 2x M10 bolts to fasten the adapter to the Mekano® channel of choice.

For CH125-2T5, use 2x M12 bolts with the corresponding adapter.

Nonie™ Principle allows for 5 mm adjustments on square holed channels by moving the bolts over to the next hole on the adapter.

Use the pre-drilled holes on the top side of the adapter to fasten the U-Strap securely.
